

Denis Maryk,

Hi Razvan

Now I can use Web Replay with Firefox! Wow my dreams are answered.

I think Web Replay is my top "add on" software. It must save me about an hour each day at least. Well done!

Denis

Darius,

Hello,

I'm using Web Replay under Vista and it works great!

I recently purchased a notebook, running XP and purchased another Web Replay license. The software works great there too!

Good job folks!

Terry Helt,

Web Replay Worked GREAT!! It had no problems working on it. We have the Windows 7 RC and it works with that just great too with no problems also. I appreciate that you had answered so quickly and helped me without problems.

I would recommend your product to my friends!

Thank you very much again

Walter Craig,

Your quick response to my problem is appreciated. Thank you! I should also let you know I have recommended your software to many of my acquaintances in the past and will continue to do so. Taking care of your clientele can be an important sales ally. Keep up the good work and have a great day! J Sincerely, Walter Craig

Loren K. Olson Jr.,

The only reason I was tired of using Roboform, is because of its limited number of installs, and the fact you then have to send email to get your installs reset.

I could not believe I was having so much trouble finding something that worked like Roboform. **That is until I found your program Web Replay. Fantastic! And thank you for making it. Be well and sell many, it really is a good one!!!**

**John Johansen,
Denmark,**

Now Web Replay works on my Portable PC as well.

Great Support!
Great Product!

Thank You

David,

Web Replay 3.0 is a great product, and I could not live without it!

Thanks!

Jaysee,

I've used WR for years and it's clearly the best PM available!

Thanks!

Pierre,

Hello,

Thanks for your great product! I'll recommend Web Replay to all my friends!

Cheers,

Pierre

L Buck - TopFlight Inc

Thanks! I love Web Replay it is awesome!!! :)

-LB

Johan,

Hi,

I use and LOVE your software Web Replay.

I have a question: any plans for compatibility with MAC and/or online service like for example Passpack.com?

I use both Windows and Mac.

Regards,

Johan, Invativa, Sweden
